

Kosovo Market Inspectorate

Coordination Body for Market Surveillance in Kosovo

Pursuant to article 24 of the Law on Technical Requirements for Products and Conformity Assessment (No. 04/L-39), the Market Surveillance Coordination Body, based on the annual reports of the Market Surveillance Authorities, prepared:

THE REALIZATION REPORT

ON THE GENERAL PRODUCT MARKET SURVEILLANCE PROGRAM FOR 2018.

The coordinating body for the surveillance of products in the market, in accordance with the competences of the Law on Technical Requirements on Products and Conformity Assessment, reviewed the reports of market surveillance authorities in implementing sectoral programs that are part of the General Product Market Surveillance Program, and have consolidated them into an annual report on the implementation of the overall market surveillance program.

Market monitoring during the reporting period was organized under the General Product Market Surveillance Program (proactive monitoring) and information from rapid information exchange system in the European Union on hazardous products (the RAPEX system), information from other network resources for the exchange of information on hazardous products, by the Customs Administration request, and by the customer complaint (reactive control).

Market Surveillance has been conducted in accordance with the provisions of the Law on General Product Safety (No. 04/L-78), the Law on Technical Requirements for Products and Conformity Assessment (No. 04/L-39), the Law Civil use of Explosives (No. 04/L-022), the Law on Pressure Equipment (No. 02/L-103) and other special laws, by-laws (regulations) and valid standards for monitored groups of products.

In the implementation of the General Product Market Surveillance Program in 2017, four inspection authorities are planned to participate within the Market Surveillance Coordination Body (Market Inspectorate (MTI), the Pressure Equipment Inspectorate of Energy (MED), the National Inspectorate for Explosive Substances, flammable substances (MIA), while the Pharmaceutic- Health Inspectorate has not participated in the implementation of the planned monitoring surveillance program due to the lack of a legal mandate to carry out the implementation of monitoring in the field of product safety, respectively in the enforcement of the surveillance of safety of toys in the market.

In the implementation of the overall product market monitoring program, which included 8 products, have participated three inspection authorities, of which (the Market Inspectorate, the Energy Inspectorate for Pressure Equipment and the National Inspectorate for Explosive Substances, Flammable Substances).

The general product market monitoring program for 2018 includes 6 products: decorative lights (light strips) for year-end holidays, extension cables, toys (age limitations), children's clothing fasteners, gas tank (gt), and fireworks-pyrotechnics, angular electric ratifying quartz electric heater.

Inspections were carried out through of supporting documents control, visual examination and risk assessment.

In the reporting year a total of 461 inspections were carried out, of which 389 inspections were carried out in proactive surveillance and 72 inspections in reactive surveillance (according to RAPEX announcements 35 and at the request of Customs Administrations 37).
